

German Stem Cell Network on Tour

Hannover – 2 April 2025

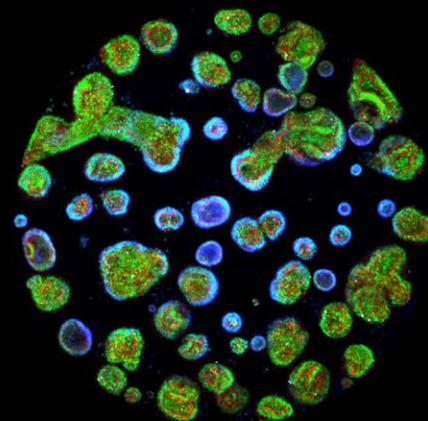

Session I: 10:45 – 12:15

Daniel Besser, GSCN
Ruth Olmer *In vitro*
modelling of inherited lung
diseases using iPSC-derived cells
Tobias Cantz *Individualized iPSC*
models of liver diseases: ethical and
biomedical implications
Carola Voss *Lung organoids for*
delineating perturbation
patterns in respiratory
health

Session III: 15:30 – 17:00

Florian Perner
Menin-MLL inhibition:
Targeting chromatin to disrupt
aberrant self-renewal in leukemia
Constanza Figueiredo
Blood Pharming: Engineering
Megakaryocytes for transfusion,
diagnostic and regenerative medicine
Nico Lachmann *In Process*
Cryopreservation meet
Continuous Production of
Immune Cells

Session II: 13:00 – 15:00

Uli Martin
hiPSC-based Heart Repair
in a Non-Human Primate Model
of Myocardial Infarction
Robert Zweigerdt
Making and repairing hearts with
human pluripotent stem cells
Eppendorf
Axel Schambach
Translation of gene therapies
using hematopoietic
stem cells

Networking

10:00 – 10:30

Welcome and Coffee

12:15 – 13:00

Light Lunch

15:00 - 15:30

Coffee & Cookies

17:00 – 19:00

Informal get together

Drinks & Finger Food

**Let's talk about
stem cell research!**

**All welcome.
Attendance free.
